Tri-County Eye Physicians: Growing with our Community

The Upper Southampton Township community has grown tremendously over the last forty years and Tri-County Eye Physicians has kept pace through several on-going practice renovations and expansions to enable us to meet the needs of our patients.

Our medical and surgical practice, established in 1973 by Dr. David Miller, has grown into the premier provider of comprehensive eye health care services in Bucks County today.

In January 2011, renovation of the Physicians' Optical shop and the patient waiting room commenced, resulting in a newly redesigned, patient-friendly facility and expanded optical department. Combined with our Medicare-approved ambulatory surgery center, satellite offices in New Britain and at Ann's Choice in Warminster, Tri-County Eye

strives to meet the demands of our growing patient population. We provide comprehensive ophthalmology, refractive cataract surgery with advanced technology intra-ocular lens implants, oculoplastic reconstructive and cosmetic surgery, pediatric ophthalmology, and routine optometric vision care services, all in a patient-friendly, state-of-the-art environment.

Fortunately for us, patients in our community have continued to recommend Tri-County Eye to friends and family, thereby ensuring our continued growth. For this, as always, we are indebted and remain grateful.
